In other releases of AutoCAD, the "Date" field in the properties palette for a drawing is the number of days since that drawing was last saved. You can tell if a drawing is backed up by looking in the 'Document Management' application. Also, when a drawing is backed up, a copy of the drawing is created with a new name and a different extension. The 'Date' field for the backed-up copy may be a few days before or after the original. This field is not part of the title of the drawing, which may make it appear as a backup to other users. It's also possible to backup drawings to CDs/DVDs. However, this requires installing drivers and a program on a computer with a drive that supports AutoCAD data. Web-based tool suite Starting with AutoCAD 2012, AutoCAD was equipped with a set of web applications, which may be accessed through the browser, similar to the way one would view an Internet page. The use of the web applications offers easy access to models through various applications like 3D modeling, blueprinting, and drafting. The web application access is available through an Internet browser. The web application is called "AutoCAD Web App" or "ARX". The web application's database includes Autodesk Knowledge Base data in addition to data from CAD drawings. History AutoCAD started development in 1987 under the name "Autodesk Datasystems". AutoCAD was originally

created by AutoDesk to design blueprints and drawings. The original AutoCAD cost \$25,000 to license in 1987. (CNN) -- A gunman opened fire at a church in central San Diego Wednesday evening, killing one person and injuring four others, police said. Dawn Laguens, a spokeswoman for the San Diego Police Department, said the man started firing with a handgun at a bar that is located next door to the church, the Basilica of Our Lady of Guadalupe. As the man was leaving the bar, he exchanged fire with someone outside the church, Laguens said. "It appears the two exchanged fire and the suspect ran to the church," she said. Laguens said there is no indication the man went inside the church. She said the suspect's condition is not known at this time. "The shooter was in custody within minutes of the police arriving on scene," she said. The name of the victim and the name of the suspect were not released. CNN's Ivan Watson, Tristan Smith, Kim Segal, Max Siegel and Dana Ford contributed to this report.
